Section 1.2 Create a POE.com account -----	5
Section 1.3 Using the AI chatbot to develop webpage-----	10

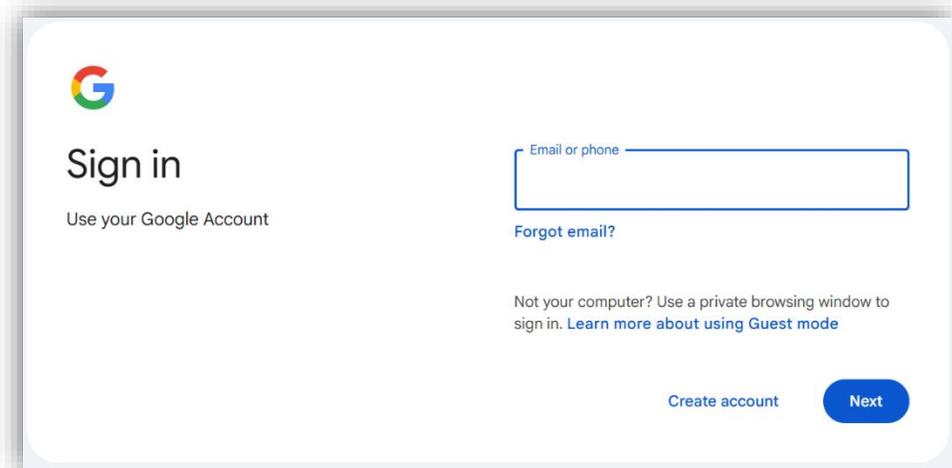

CHAPTER ONE — SETUP YOUR COMPUTER

We will rely on the platform POE.com to use an AI chatbot, such as openAI chatGPT. A gmail account is needed. Please follow the steps below

Section 1.1. Create a gmail account

If you do not have a separate gmail account for yourself, please create one now. Follow the steps below to register a gmail account.

Step 1: Go to www.gmail.com

Click on “create account” and choose “for personal use”. If the web browser shows something else, please either “logout” or click on “use another account”.

Enter a fake date of birth, and go to next.

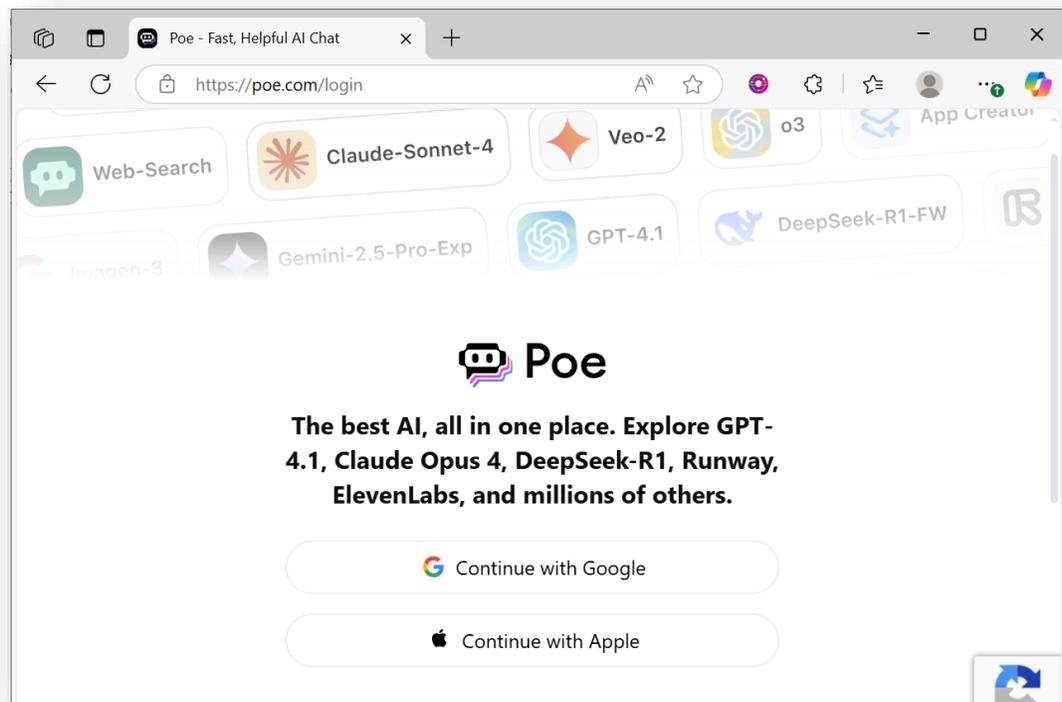

Step 2: Figure out a username for your gmail

Think about a username. Due to the large volume of gmail accounts, some popular usernames have been used already. You may use a gmail username that starts with “albany”, or anything that is more specific, such as albanyJohn@gmail.com.

Section 1.2 Create a POE.com account

There are two major platforms for AI chatbots. One is the POE.com and the other is huggingface.com. The POE.com is for users of AI, while the huggingface.com is for developers. We will need to create an account with POE.com. Follow the steps below.

Step 1: Go to www.poe.com

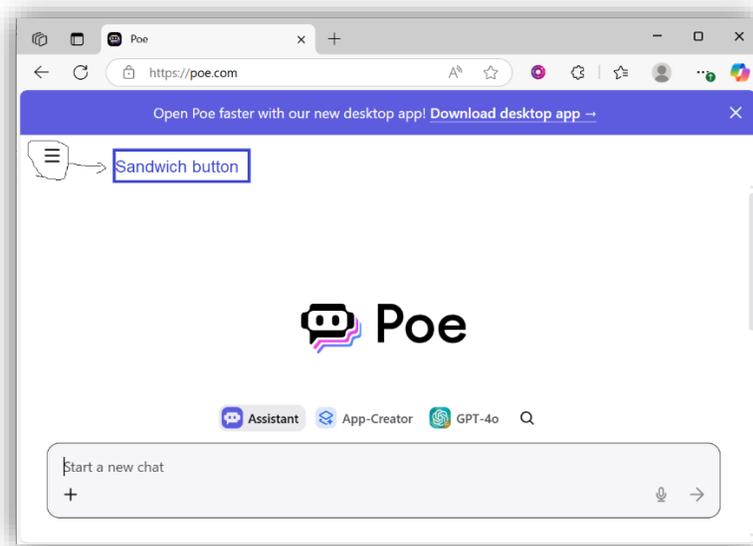

If the web browser shows something, please logout first. We will show how to logout in another step.

Then, click on “continue with google”. You will then be directed to the login page of your gmail. Login gmail will also login POE.com.

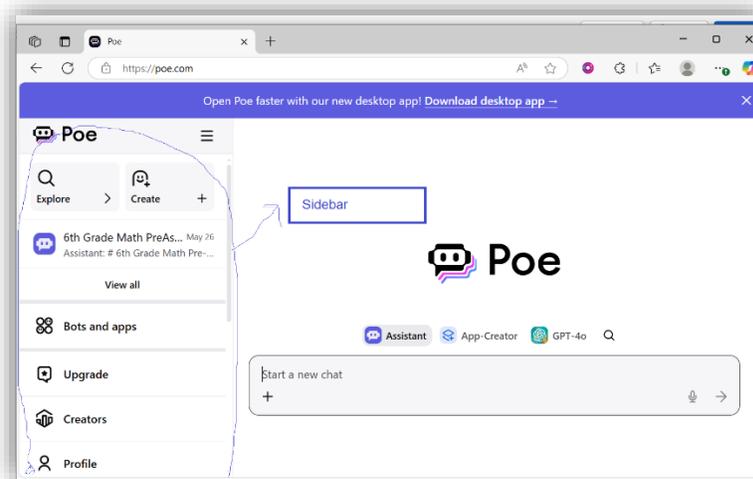

For the first login, it may ask you to subscribe to their plans, please ignore it. I will add you to my team and you can still use it within my team.

Step 2: Get familiar with POE

The POE platform provides a sidebar on the left-hand side. If you do not see it, you can click on the sandwich button to show it.

The POE with sidebar

Step 3: Select your chatbot

You can select a chatbot by clicking on “Bots and apps”. A dialog window will pop up. You can select any chatbots provided.

The following is a list of the popular chatbots.

Chatbot name	Company	capabilities
Assistant	POE ()	
GPT-4o, GPT-4.1, o3, GPT-Image-1, o4-mini	OpenAI	
Claude-Opus-4	Anthropic	
Gemini-2.5	Google	
DeepSeek-v3	Deep Seek (China)	
Llama-4-scout-b10	Meta	
Grok-3	X or X.ai	
Qwen-3-	Alibaba (China)	
Mistral-medium	Mistral AI (French)	
Mercury-coder	Mercury	
QwQ-	Alibaba (china)	
GPT-researcher	OpenAI	
Web-search	Anthropic	
Perplexity-	Perplexity AI	
Flux-	Black Forest Labs	
PlayAI-	Applied Voice AI research	
Unreal-	Unreal Engine	3D images
ElevenLabs	Advanced generative AI for audio	Text-to-speech
Cartesia	Cartesia	
Orpheus-	Canopy AI	Text-to-speech
Imagen-	Google	Text-to-speech
Ideogram-	Ideogram, INC	Text-to-image

Luma-	Luma Health	Patient management
Hidream-	HiDream AI	Text to images
Retro-diffusion	Astropulse	Image generation
StableDiffusion	Stability AI	Text and image generation
Pixverse-	PixVerse (china)	Video generation
Kling-	Kuaishou AI (China)	Video generation
Clarity-	Bloomreach	Online conversation
TopazLabs	Topaz Video AI	Video generation
Veo-	Google	Text-to video
Runway-	Runway AI	Video/image generation
Pika-	Pika labs	Text-to-video
Dream-machine-		
TwelveLabs		
Hailuo-		
Ray-		
Wan-		
Trellis-		
Bria-		
FASHN-		
Aya-		
DeepClaude		
Gemma-		
Phi-		
LivePortrait-		
Command-		
DALL-		
RekaCore-, Rek-Flash-		
Sketch-to-Image		
Recraft-		
Solar-		

Remove- background		
Sana-		
Tako-		
Restyler		
Python		
MarkItDown		
Mochi-		

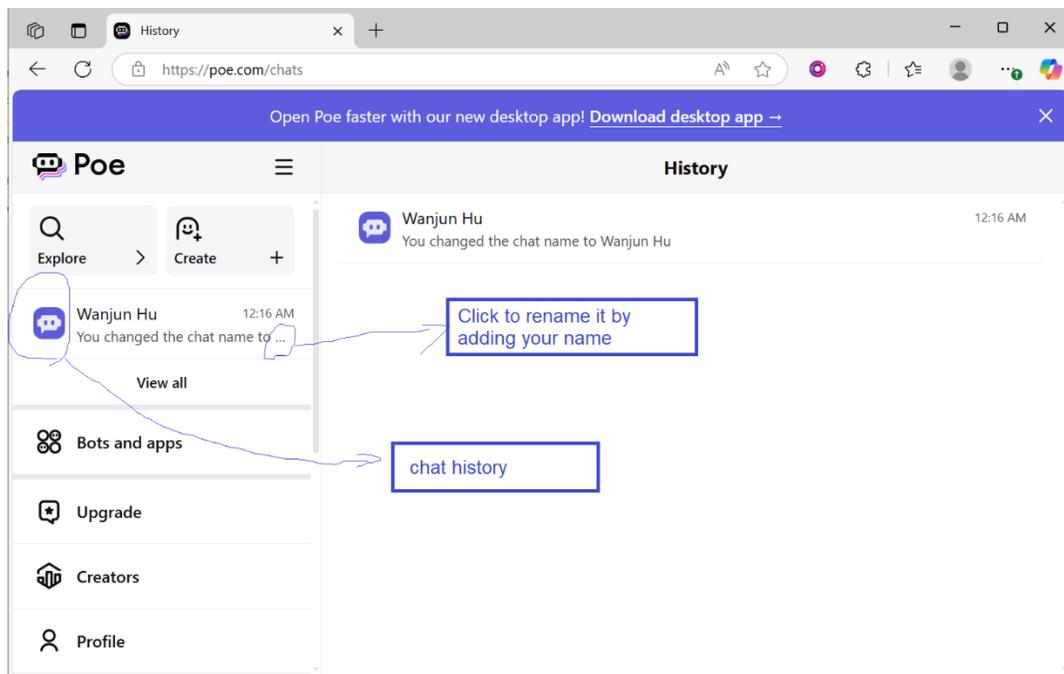

You can try any of the chatbots. However, the POE's assistant is still a good choice. In addition, you can add ElevenLab which can read the generated text to you.

Section 1.3 Using the AI chatbot to develop webpage

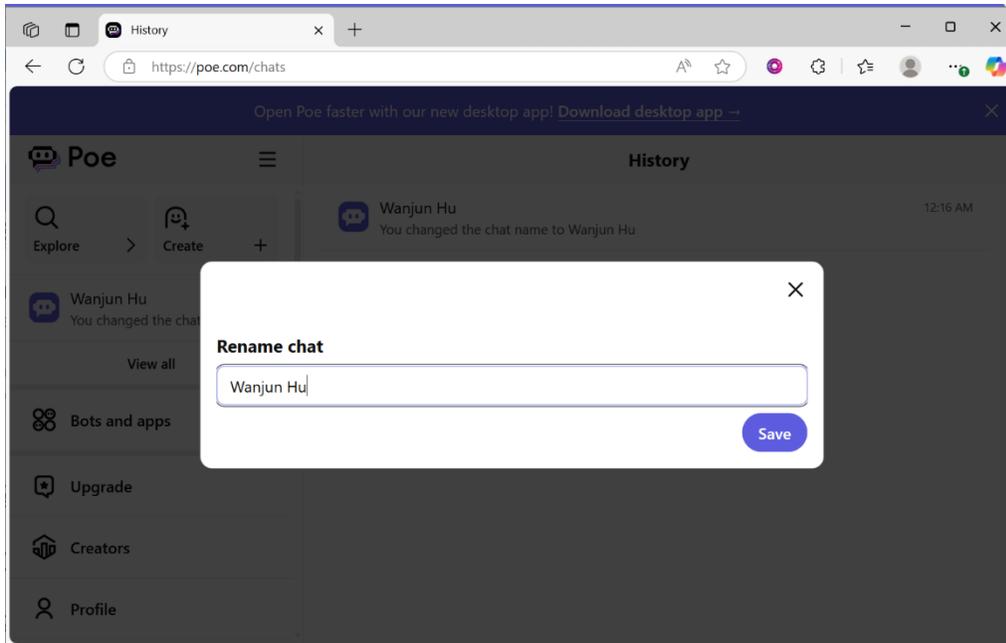

When using the POE chatbot, please rename your “chat” to your own name. The major reason for that is that you all will share the same purchase inside my account, which is goneasu@gmail.com, or “guest_one”. When clicking on the “history” on the sidebar, you will have many chat histories. Certainly, the quickest way to continue your chat is to locate by your name. Rename the chat will help you.

Step 1: Rename your chat

Click on the “history icon” shown below, and find your chat. Then click on “...” and select “rename”. Type your name first. Then add something else.

In the dialog window, type your name first. Then add anything else.

Step 2: Now, you can chat with AI.

Since the AI is a machine, it process every word you type. Some popular words may cause computing problems. For instance, avoid use the words “please”, “thank you”, “can you”, etc. Make it simple to give a command. The AI will not need to process those unnecessary words. They are important for people. However, they are not important and waste of computing power for AI. For instance, use the following prompt.

“Create a webpage that contains a test of 40 questions. Make it automatically graded. When grading, indicate which question is answered correctly. Topics include Place Value
Adding and Subtracting Whole Numbers
Estimating Sums and Differences
Multiplying Whole Numbers
Estimating Products
Dividing Whole Numbers
Estimating Quotients
Negative Numbers
Adding with Negative Numbers
Absolute Value
Plotting Ordered Pairs
Distance “.
